

OCR Benchmark Memo

Executive Summary

This one-page document is designed to measure plain text latency. It contains short paragraphs, a compact list, dates, identifiers, and a small footer.

Scope

The parser should preserve headings, paragraph order, and simple bullet-like lines without needing layout reconstruction.

Checklist

- Intake ID: OCR-BENCH-001
- Review date: 2026-05-19
- Owner: Synthetic Benchmark Team
- Expected output: readable Markdown with stable paragraph order

Notes

Short documents are useful for measuring fixed request overhead. They also help separate service startup latency from page-level processing time.
